

Installation

Installation of the Piano Realism Pack requires the execution of multiple steps to be performed *exactly* as written in the instructions. Checkboxes are provided for marking your completion when you print these instructions.

First: Prepare for installation using these steps:

1. Backup your MOTIF XS to a MOTIF XS-compatible USB storage device. Refer to the MOTIF XS Owner's Manual for instructions on how to perform this procedure. This is necessary to avoid data loss.
2. Press the **[UTILITY]** button, then press the **[Control]** soft button, and then press the **[MIDI]** soft button.
3. Take note of the **Local Control** ____ and **MIDI In/Out** ____ settings so that you can restore them if necessary. Also note any other global settings that are not defaults.
4. Ensure that you have the latest firmware in your synthesizer before proceeding. Refer to the MOTIF XS Owner's Manual for instructions on how to obtain and install that firmware.
5. Copy the "PRP.X0A", and optionally the "XSSampleBank.X0A" files from the respective distribution media to a MOTIF XS-compatible USB storage device using a computer.

Second: Install the Piano Realism Pack using these steps:

6. Press the **power switch** of your MOTIF XS to turn it **off**; wait 5 seconds, then press the **power switch** to turn it back **on**, and wait for its boot process to complete.
7. Insert the USB storage device into the MOTIF XS.
8. Press the **[FILE]** button, then use the jog wheel (if necessary) to **set Type=all**.
9. Press the [\wedge] and [\vee] buttons to **select** the "PRP.X0A" file.
10. Press the **[Load]** soft button, and then press the **[INC/YES]** button to confirm.
11. To restore the **Local Control** and **MIDI In/Out** settings that you noted earlier, press the **[UTILITY]** button, then press the **[Control]** soft button, and then press the **[MIDI]** soft button. Then press the [\wedge] and [\vee] buttons and use the jog wheel to change the values as necessary. *Restore other global settings only after you have tested the Piano Realism Pack.*
12. If you do not have DIMM memory installed: installation is complete. Press the **[EXIT]** button to exit File mode, read the notes below.

Third: If you have DIMM memory installed, load the S700 piano by following the remaining steps:

13. Load the S700 piano from the XS Sample Bank using these steps:
 - a. Press the **[FILE]** button.
 - b. Press the [\lt] and [\gt] buttons and use jog wheel to **set Type=voice**.
Keep the default settings: Part=1, Bank=USR 1:001.
 - c. Press the [\wedge] and [\vee] buttons to **select** the "XSSampleBank.X0A" file, and then press **[ENTER]**.
 - d. Press the [\vee] button to **select** the "S700 for XS" voice.
 - e. Press the **[Load]** soft button, and then press the **[INC/YES]** button to confirm.
14. Installation is complete. Read the notes below.

Note 1: If you load another file with Type=all, it will overwrite the Piano Realism Pack voices and performances that you've installed. Once the synthesizer has been loaded with the S700 piano, it is recommended to save your configuration with a Type=all for faster loading. For instructions on restoring individual voices from the backup you made prior to installation, please consult the MOTIF XS Owner's Manual.

Note 2: The Piano Realism Pack S700 voices are programmed to use the first three user waveforms, as follows:

- Waveforms USR: 001 S700SftSt
- Waveforms USR: 002 S700MedSt
- Waveforms USR: 003 S700HrdSt
